ATTIRANCE BRAND

Attirance is a brand of exclusive fragrances and cosmetics that draws inspiration from eighteenth century refinement, beautifully exemplified by the Domaine de Trianon at Versailles. Since its creation in 2003, Attirance has been developing innovative solutions for its customers in search of natural products with a feminine feel, using the timeless beauty secrets so dear to Queen Marie-Antoinette. Through its rich, sophisticated products, the brand has become a gold standard the world over for modern women who are sensitive to elegance with a "French touch". Attirance is a captivating brand driven by creative energy, inspired by triumphant and harmonious femininity, characterized by natural as a means of expression and guided by a luxury ideal that holds the promise of happiness. All of these contemporary values are firmly fixed in a French tradition of heritage, longevity and modernity. Attirance is for all those seeking luxury and authenticity, all those who are still fascinated and inspired by France and its tradition of luxury rooted in Versailles. For those who want to give meaning to their life and thus their consumption, the Attirance collections provide a guarantee of reconnecting with forgotten scents and products, tied to History, and offer new, sense-awakening experiences. The spirit of the eighteenth century, refined and brilliant, is revisited with an ultra-contemporary twist. These present-day consumer values are based on the prestige of Versailles and the French art of living.

Attirance aims to be a natural and organic brand for skin care, hair care and fragrances. A brand that respects and maintains women's natural beauty, far from fixed and artificial images. The Château de Versailles remains one of the most highly visited locations in the world and a creative impetus for the Attirance brand. Now the Palace of Versailles stores can also be purchased Attirance output.

Attirance embraces a timeless and flamboyant lifestyle. "Provocative" and sexy, yet very elegant, this attitude releases a rebellious, highly aristocratic, energy. The aristocratic values of the eighteenth century also included elegance and extravagance. The aristocrat was a free man who liberated his mind and his body. Life was carefree and devoted to pleasure, but with an unprecedented refinement. It is the "Triumph of Life", "carpe diem". And that very essence of French taste, made of balance and temperance, has been sought since the eighteenth century, it introduces Attirance shop interior.

Our task is to create "Attirance" about global world brand that will allow humanity to think about the spiritual and cultural values, as the sole basis for the survival of any nation.
